

T-slots

To clamp and guide an element on the granite, appropriate T-slots machined directly into the granite are used for minimum tightening torque, and in steel for uses that require holding strength.

A	B	C	D	E	F	G
8	15	8	10	30	30	80
10	21	9	11	30	30	80
12	21	9	13	30	30	80
14	24	10	15	40	40	100
16	27	11	17	40	40	100

Tolerance of H7 for the guide E +/- 0.2mm for the frame.
Measurements are expressed in mm.
